

Palliative Care Program

Mission Statement

We are a home health care organization that is entrusted to provide skilled services to patients with serious, progressive, chronic, life-limiting or life-threatening illnesses.

Our care is based upon the most **current body of evidence and best practices**; and is provided as a complete continuum for any patient living with a chronic progressive disease, from early (often at the time of diagnosis) through the end stages of the illness.

Every day we work as a **united, collaborative team** of healthcare professionals; to help people facing serious illness live more fully, in comfort, with spiritual support and dignity.

Our main goal is to **enhance quality of life** by providing expert interdisciplinary care, consultation, support and education for those affected by serious illness, death or grief. We are a leading community resource for this type of care.

Types of patients we care for under this special program

- ✓ Patients living with cancer (seeking curative and/or palliative treatment)
- ✓ Cancer survivors with a high symptom burden
- ✓ Dementia and cognitive impairments
- ✓ Heart Failure, cardiomyopathy and other cardiovascular conditions
- ✓ COPD and respiratory disorders
- ✓ MS, Parkinson's, ALS, Stroke and other neurodegenerative disorders
- ✓ Renal and hepatic diseases
- ✓ Diabetic patients
- ✓ Palliative wound care
- ✓ Lymphedema care

Enhancing the quality of our patients' lives, and the lives of those who care for them, has an amazing way of enhancing our own.
